PROFILE

I write and edit for businesses that need to be understood, then design and build the page so the message survives the trip from the doc to the browser. Most of my writing has been for healthcare, senior-living and software companies. I work as an independent contractor, inside the client's brief, tools and review process.

EXPERIENCE

Editor (contract) · Hurrdat — Aug 2026 – present

- Editorial review, copyediting, fact-checking and SEO alignment of long-form articles for a digital marketing agency's senior-living client, against its editorial standards.
- Prepare each article for final approval: sources checked, comments resolved, links and formatting confirmed.

Founder · Billing4ABA — 2026 – present

- Founded a billing company for ABA therapy clinics; wrote, designed and built its website and ten plain-English guides to the revenue cycle (billing4aba.com).

Content writer & editor (independent) · Self-employed — 2023 – present

- Blog posts, service pages and website copy for healthcare, senior-living and software businesses.
- Structural and line editing of other writers' drafts, with briefs and quality checks.

Content strategist & systems lead · CloudRCM Solutions — 2021 – present

- Built the marketing and content function for a medical billing company from zero: its website, service pages, landing pages, case studies and sales materials.
- Lead client communication and reporting for billing clients, and the systems behind them.

SELECTED WORK

Kitewell
Pediatric ABA clinic website with parent and clinic-team views

Billing4ABA
Live founder-led business website with ten guides

How I write an article
One patient article from brief to final, every stage shown
